

Moplen RP6110

Non Phthalate Medium Flow Random Copolymer Polypropylene for Houseware

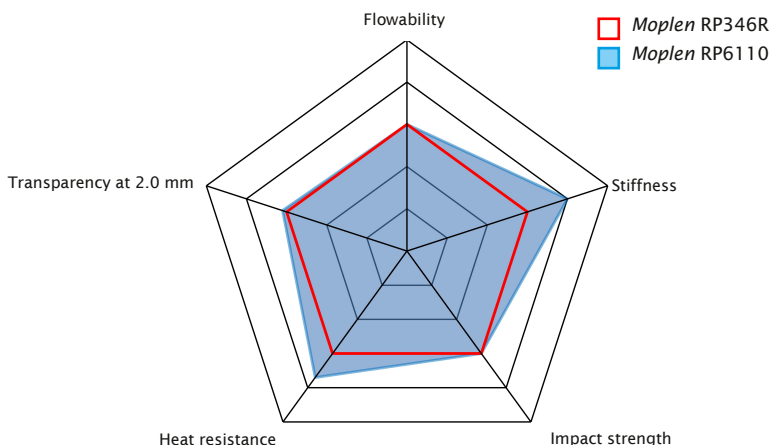

Moplen RP6110 is a medium melt flow polypropylene random copolymer for houseware applications.

As consumers become more health conscious, the demand for the non phthalate based PP grades is increasing. Responding to this market trend HMC Polymers has introduced PP random copolymer, *Moplen RP6110* produced using next generation non-phthalate catalysts.

Moplen RP6110 is developed for the manufacturers who require enhanced processability, excellent organoleptic property, and good aesthetics for injection molded housewares.

In addition, *Moplen RP6110* is designed to improve flowability and mold-filled ability to reduce cycle time and energy consumption.

KEY FEATURES

Productivity improvement

- Broad processing window
- Short cycle time

Excellent stiffness & Impact balance

- High stiffness
- Good impact resistance

Good aesthetic properties

- High transparency and glossiness
- Color shade improvement

Excellent organoleptic

- Low odor and migration

You can find out more by visiting our website at: hmcpolymers.com

PROPERTIES

- High transparency and gloss
- Excellent organoleptic property
- Superior balance of stiffness and impact properties
- Ease of processing allows increased design freedom.

TYPICAL APPLICATIONS

- Food containers
- Household products
- Large size containers
- Stationery
- Furnitures
- Clear injection part
