

# Moplen RP348NP : Next Generation PP random copolymer for Houseware

## Plastic Containers

Current generation PP

Non-Phthalate PP

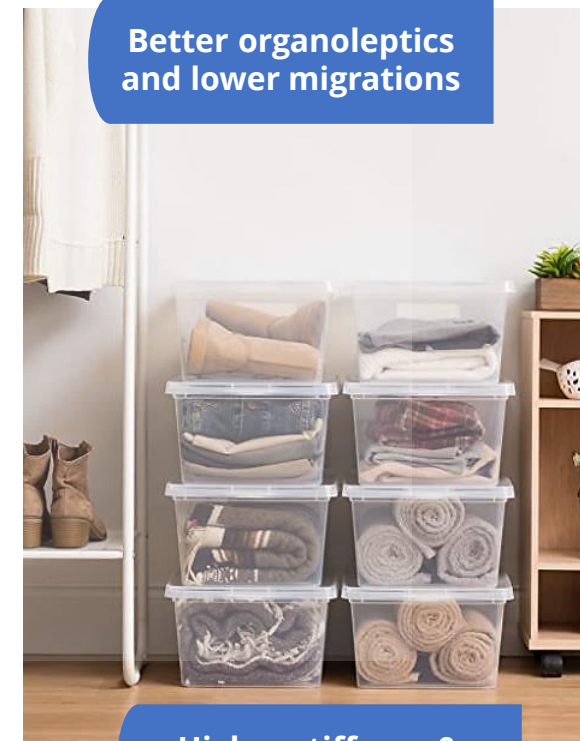

Low Warpage

**Non-phthalate version** is successfully used by domestic and export customers

- 01** Higher stiffness leading to better stackability performance
- 02** Lower warpage and good dimensional stability
- 03** Higher heat resistance
- 04** Better organoleptic and lower migration
- 05** Comparable clarity and haze

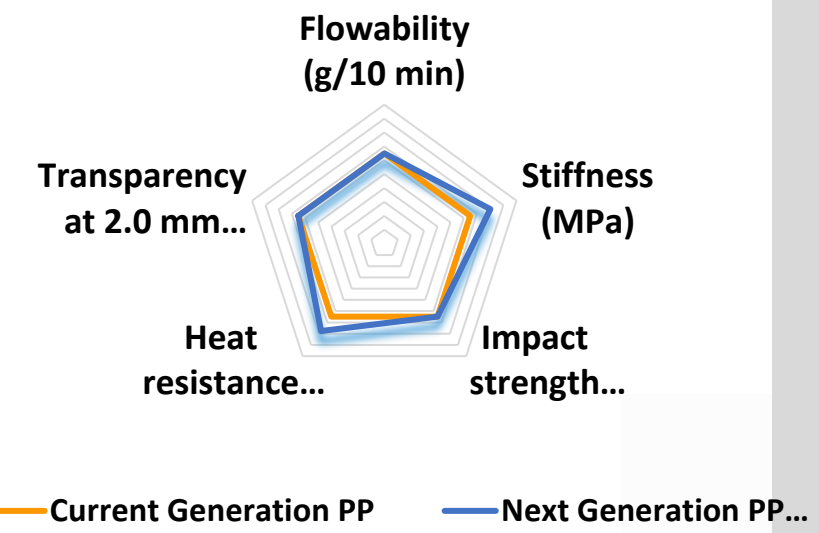

Better organoleptics and lower migrations

Higher stiffness & better stackability

# RP348NP : Next Gen PP Random copolymer for Baby feeding bottles

**Non-phthalate version** is successfully used by domestic and export customers

- 01** | Higher stiffness leading to better stackability performance
- 02** | Lower warpage and good dimensional stability
- 03** | Higher heat resistance
- 04** | Better organoleptic and lower migration
- 05** | Comparable clarity and haze

- Higher heat resistance
- Better dimensional stability after sterilization

- Equivalent processing, drop impact and optical properties
