Hostalen PP H2483
High Modulus Impact Copolymer (PP-HM) for Drainage and Sewage Piping

Product Description

Hostalen PP H2483 is a PP block copolymer classified as PP-HM (High Modulus) according to EN 1852-1 used in the production of solid wall pipes and structured double wall pipes.

The combination of high stiffness with good impact strength at both room and low temperature, allows for a reduction of pipe wall thickness which leads to lower pipe weight, while maintaining the same ring stiffness level.

Delivering benefits for:
- Pipe weight reduction compared to standard PP-B, PVC and HDPE
- Easy handling and installation

In addition, Hostalen PP H2483 offers:
- Excellent chemical resistance
- Dimensional stability over a broad temperature range
- Heat resistance
- Long service life and ease of maintenance of installed pipes

KEY FEATURES
- High impact resistance
- High stiffness
- Extraction resistant
- High heat resistance
- Low temperature impact resistance

TYPICAL APPLICATIONS
- Pipe extrusion
- Sheet extrusion
- Underground drainage and sewage systems
- Injection molding of plumbing fittings
